# OCTOPUS<sup>®</sup> TE

Tissue Stabilizer

*Endoscopic tissue stabilization*

# A Significant Step Closer to Totally Endoscopic CABG

The Octopus® TE Tissue Stabilizer is the latest innovation from Medtronic, the market leader in minimally invasive beating heart surgery products.

Whether you are performing coronary procedures with a robotic system or using a small thoracotomy, the Octopus® TE stabilizer is key to facilitating your procedure.

The Octopus® TE device is a reusable tissue stabilizer with collapsible pods that enable insertion into and removal from the thoracic cavity through a port, thus eliminating the need for an incision for insertion of the stabilizer.

Integrated irrigation for better exposure

Custom positioning arm facilitates easy setup

Stabilizer feet collapse for cannula insertion

Collapsible pods for insertion/removal through a 12mm port
